

Assignment 15 and Bonus Assignments

(100 marks) Following Assignment 11 and using Lesson 1 of week 20, create the risk factor page with two containers, one with the options and the second for the selected options. The user should be able to drag all or some options as applicable. Apply any design of your choice. Use the options in the below image:

Risk Factors Form

In the last 12 months, drag the options that apply

Had sex with males		
Had sex with females		
victim of sexual assault		
homeless		
incarcerated		
possible exposure		
routine screening		

Risk Factors Form

In the last 12 months, drag the options that apply

Had sex with males		incarcerated	
Had sex with females			
victim of sexual assault			
possible exposure			
routine screening			

homeless		

Bonus Question 1 (100 marks)

Please create a page that collects all the values entered in the registration form and returns it as a map. Display the values on the page.

Bonus Question 2 (100 marks)

Using HTML, CSS, and JavaScript, create a scientific calculator that returns the sum, difference, product, square and square root of selected numbers.

Bonus question 3 (100 marks)

After the complete design of Assignment 11 and 15, create a walkthrough video or demo of your work and post it on any social media handle tagging the school's page. Submit the link to your post.
